MOHAMED ABDULKARIM MOHAMED

+44 7956 765580 • Mohamed.m365@outlook.com • GitHub: Mohamed1756

PROFESSIONAL SUMMARY

Full-stack developer skilled in AI/ML systems, scalable backends, and production deployments. Proven ability to build impactful applications from concept to launch, driving both business and user value.

PROFESSIONAL EXPERIENCE

Founder & Lead Developer **2023–Present**

Personal Ventures — AI & Software Development

AI Contract Analysis Platform (June 2025-Present)

- Built full-stack legal document analysis platform that processes contracts in under 1 second and extracts key terms (liability caps, termination dates, governing law)
- Developed Python backend with natural language processing to automatically identify and extract critical contract clauses with 85%+ accuracy
- Created React dashboard with "Smart Score" contract health ratings, risk analysis, and LLM-powered Q&A for ambiguous document queries
- Implemented drag-and-drop interface with real-time processing feedback and automated PDF report generation
- *Tech: Python (Flask, NLP libraries), React/TypeScript, LLM APIs*

Clipfeed.xyz - AI Content Generation Platform (Nov 2024-Apr 2025)

- **Live:** clipfeed.xyz — **Demo:** YouTube
- Built an AI platform that automatically generates short-form clips from long-form videos and podcasts by analyzing content and identifying key moments
- Developed client-side video processing using computer vision for scene detection and audio analysis for sentiment-based clip generation
- Integrated speech-to-text with 95%+ accuracy enabling content-based navigation and automated transcript generation
- Achieved client-side video processing with instant clip downloads using browser-based FFmpeg
- *Tech: React/TypeScript, FFmpeg (WASM), Node.js, AssemblyAI, Firebase, Vercel*

Real-Time Crypto Liquidation Monitor (Mar-May 2025)

- **Live:** cryptoliqfeed.netlify.app — **Repo:** GitHub
- Built real-time dashboard monitoring cryptocurrency liquidations from 3 major exchanges
- Processed 10,000+ liquidation events per hour via WebSocket connections with sub-second latency
- Created alert system for large liquidations and funding rate analysis to identify arbitrage opportunities
- Gained 17+ GitHub stars and organic user adoption without marketing or promotion
- *Tech: TypeScript, React, WebSocket, Chakra UI, Recharts*

TECHNICAL SKILLS

Languages	JavaScript, TypeScript, Python, Java
Frameworks	React, Next.js, Node.js, Express
AI/ML	LangChain, HuggingFace, LLM APIs, Vector Databases
Cloud & DevOps	AWS, Azure, Docker, Git, CI/CD
Databases	PostgreSQL, MongoDB, Firebase

EDUCATION & CERTIFICATIONS

BSc (Hons) Computer Science **2018–2021**

Brunel University of London *Upper Second-Class Honours (2:1)*

- Specialization: Software Engineering & Artificial Intelligence
- Key Coursework: Algorithms, Data Structures, Machine Learning, Distributed Systems, AI, Database Design, Software Architecture, Software Design

Microsoft Certified: Azure AI Fundamentals (2023), Azure Data Fundamentals (2023)
